

Carlton Building Faith Centre – University of Bradford

Project Brief

The University of Bradford required a new faith centre and prayer facility to be located in an existing building as a refurbished area that adheres to the users religious needs and complies with the University's strict sustainability standards.

Project Summary

The refurbishment required a detailed and informative design process to incorporate the client's high specification of energy efficient technology and the users' religious sensitivities and requirements. The project features modern social spaces, bespoke religious washing facilities and a large open prayer area utilizing natural light.

Aspect 4 provided both Project Management and Quantity Surveying services; ensuring a singular client focussed approachable body for cost and programme knowledge throughout the process.
