

Dentdale Building – Askham Bryan College

Project Brief

Askham Bryan College required a single storey teaching and accommodation block to provide a high class learning and independent living environment to students with learning and behavioural difficulties.

Project Summary

The building incorporates energy efficient technology and was constructed to maximise environmental performance. The development features a large living and teaching space that utilizes natural light excellently. The high quality build and externals in particular complements the surrounding rural experience of the land based college.

Aspect 4 provided early accurate cost advice to ensure the client had an in depth comprehension of the project. The building was constructed whilst the college remained operational and against a challenging programme.

Key Companies

Simpson, Seven Architecture,
